

Threatened Species Garden

Around a third of the native plants in our garden are threatened with extinction. This garden tells the stories of a select few, each one rare, resilient, and worth protecting.

Agathis australis

Alseuosmia quercifolia

Arthropodium cirratum

Ascarina lucida

Brachyglottis kirkii

Brachyglottis pentacopa

Carmichaelia muritai

Carmichaelia williamsii

Clianthus maximus

Coprosma acutifolia

Coprosma waima

Corokia buddleioides

Dacrydium cupressinum

Earina mucronata

Elingamita johnsonii

Eryngium undulatum

Lepidium banksii

Leptinella potentillina

Leptinella rotundata

Leptinella tenella

Lobelia physaloides

Lophomyrtus bullata

Machaerina complanata

Melicytus flexuosus

Melicytus orarius

Metrosideros bartlettii

Muehlenbeckia astonii

Myosotidium hortensia

Myosotis petiolata

Myosotis saxosa

Olearia cheesemanii

Pennantia baylisiana

Phyllocladus sp

Pittosporum 'Chantilly'

Pittosporum pimeleoides

Podocarpus totara 'Aurea'

Pseudowintera colorata

Pseudowintera insperata

Raukaua edgerleyi

Scleranthus biflorus

Veronica adamsii

Veronica armstrongii

Veronica breviracemosa

Veronica pubescens subsp. sejuncta

Veronica punicea

Veronica speciosa

Veronica stenophylla
